Professional resume

Highly motivated Web Applications Developer with experience in crafting efficient and appealing web solutions. Possesses strong skills in both front-end and back-end programming, with a focus on modern technologies such as Git, Jira, HTML, CSS, JavaScript, and frameworks like React, Symfony, and Node.js. Passionate about problem-solving and continuous learning. Committed to delivering high-quality projects within tight deadlines. Ready to bring innovation and technical prowess to a dynamic team striving for excellence in web development.

Experience

27/09/23 - 01/12/23
Project development management • Web developer • Startidea

During my time at this company, I worked on a project that utilized technologies such as Symfony and Directus, among others. Jira was used for project management and administration.

Education

15/09/21 - 06/20/24
IES Hermenegildo Lanz, Granada – Higher Vocational Training
- At this institution, I trained as a Web Application Developer (DAW). Throughout this period, I acquired knowledge from various modules necessary for working in the field of web development, including Object-Oriented Programming, Databases, Web Deployment, JavaScript, React, Symfony, among others.
